

A commitment to intelligent growth.

Over the last few years, LogiWare has developed Logistics technologies, services and solutions that help companies manage their logistics more efficiently while dramatically reducing the costs of operations.

Today, LogiWare is applying its domain expertise in managed services, consulting, custom software development, business intelligence, and market analytics to solve the significant problems encountered by businesses and organizations working together to drive innovative initiatives.

LogiWare—the platform for growth.

LogiWare is a unified platform to market that specifically addresses the key issues of global logistics and development. Access to relevant, cost-effective, on-demand business intelligence, which fosters effective collaboration and lowers the costs and investment risks of technology.

LogiWare provides solutions that address key processes and functions, and a professional networking solution that helps people across companies and organizations connect with one another. LogiWare products are primarily delivered via standard web browsers and offered at rates that are a fraction of the cost of other technologies. LogiWare also provides custom analytics and application development for organizations that need specialized solutions to address specific needs.
